FROM: Frank J. Filas, Reclamation Engineer 

RE: Site Inspection, DOE/O15/O14 - Western Services Specialties
and DOE/O15/O15 - Baritco

In early 1982, the Division received the above-referenced Declaration of Exemption applications. They are situated approximately six miles (as the crow flies) southwest of Woodside. Commodities to be mined were listed as precious metals and barite, respectively.

A July 7, 1987, site inspection found a half-dozen shallow trenches (3' deep x 15' x 4') and associated spoil piles. The ground in this area consists of broken up shale. The most recent assessment work posted on the three or four claims in this vicinity was 1985. It is recommended that both files be closed.
